

The Cleanroom Specialists

Armor-Bond: The #1 Specified Strip Doors in the Industry!

With Armor-Bond strip doors you can cover door openings, both large and small, yet ensure easy pass-through by a technician, transport cart or forklift. Armor-Bond strip doors prevent up to 80% to 90% of air loss that occurs when main doors are opened or left ajar.

In the cleanroom setting this means environments remain protected from contamination. In industrial applications temperatures remain stable; there is less food spoilage, less shrinkage, less frost build-up on coils. Our warehouse strip doors mean reduced wear and tear on compressors, motors and switches.

Armor-Bond strip doors mean fewer problems, more profits!

Compare and Look for a Full Measure of Quality. Armor-Bond Strip Doors Prevail Against the Competition

In a market where many industry experts have labeled strip doors a commodity product, Armor-Bond still stands out. Why, just compare these two photos:

CleanAir Solutions, Inc. 826 Bayridge Place, Fairfield, CA 94534 Tel. 707-864-9499 Fax. 707-864-9399
