STAINLESS PASS THRUS

Designed as an inexpensive way to minimize contamination in controlled environments, our standard pass thrus feature interlocking doors which help maintain the cleanroom seal.

The units are available in a variety of construction materials such as plastic laminate, aluminum, cold-rolled steel, stainless steel and polypropylene.

Our pass throughs are available in virtually any size and with a large array of options to meet your needs.

Features:

- Airtight gasketed seal
- Continuous hinge doors
- Freezer-type latching system
- Mechanical interlocks
- Thick 1/2" Plexiglas doors
- Trim kit

Options:

- Automatic doors
- Electric interlocks
