Softwall Cleanrooms

Our *Flexible Solutions* Softwall Cleanrooms
Control a Variety of Workspace Environments
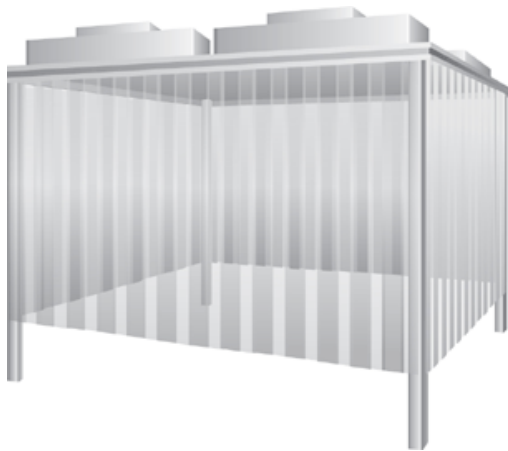

We offer both standard designs and custom-engineered softwall cleanrooms for demanding and unique applications. Self-contained *Flexible Solutions* Softwall Cleanrooms are offered in ISO Class 5 through 9, or US Federal Standard 209 Class 100 through 100,000. Standard rooms are equipped with *SAM*® Fan Filter Units for HEPA filtration, lighting, a 4´ strip door, and solid curtain wall panels.

We offer several options including castors, telescoping legs, a variety of curtain choices, and our exclusive state-of-the-art *Airlink* Control System. With our optional castors, you can easily roll the *Flexible Solutions* Softwall Cleanroom from one location to another for maximum flexibility.
